**Microsoft Gold Certified Partner, Elliott Davis Technology Solutions, LLC (EDTS),
Joins Microsoft Security Software Advisor (SSA) Program**

AUGUSTA Ga., July 15, 2008 – Elliott Davis Technology Solutions, LLC (EDTS), a full-service technology consulting firm, announced its enrollment in the Microsoft Security Software Advisor (SSA) Program. EDTS, a Microsoft Gold Certified Partner, earned this membership as an active holder of one of the eligible Microsoft competencies.

EDTS' current Microsoft competencies include: Advanced Infrastructure Solutions, Mobility Solutions, Networking Infrastructure Solutions, Information Worker Solutions, and Security Solutions.

The SSA Program enables EDTS to deliver more comprehensive, integrated and simplified security solutions including identity and policy protection and access for its infrastructure solutions. As a partner, EDTS can recommend and deploy Microsoft security products and technologies, such as Microsoft Forefront and Microsoft Identity and Access. These products provide key solutions for secure messaging, secure collaboration, endpoint protection, and identity and secure remote access.

"We are excited about this opportunity to help our clients improve their security posture and extend our service capabilities with Microsoft's security software portfolio," says Charles Johnson, EDTS' managing shareholder.

About EDTS:

EDTS is a full-service technology-consulting firm offering a wide range of comprehensive business technology services. They concentrate on providing end-to-end networking and security solutions for clients in the Southeast with primary focus areas of practice in network integration, support, security and maintenance.
